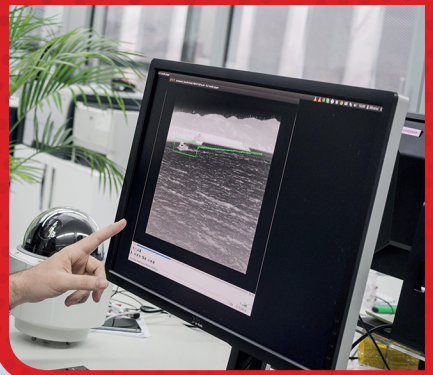
VIDEO ANALYTICS

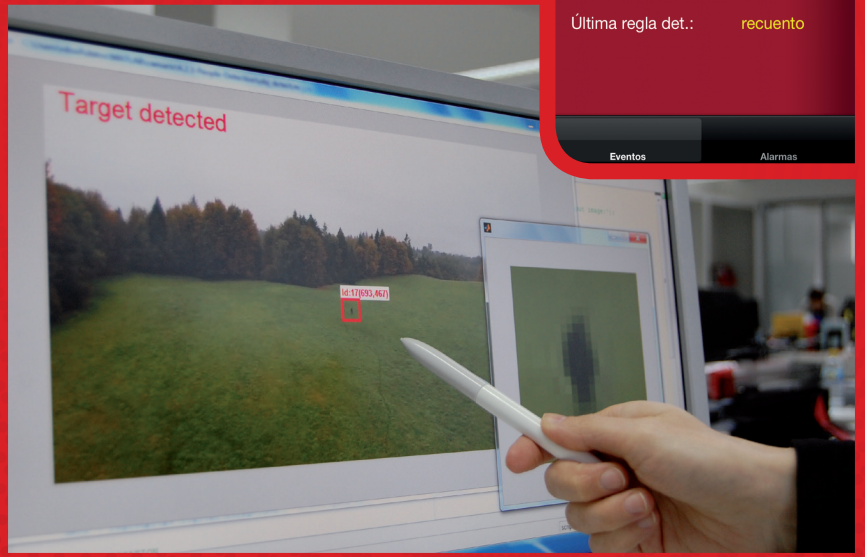
Borders, critical infrastructures, smart cities... The world is demanding intelligent video surveillance of truly challenging scenarios from land, sea and air.

Gradiant provides video analytics for complex environments and deployments.

Video analytics in complex scenarios

- Highly dynamic natural environments
- Low visibility: visible and IR sensors and sensor fusion
- Moving camera: on-board and PTZ
- Aerial video



Markets


- **Security and safety:** border protection, search and rescue, security of critical infrastructures
- **Law enforcement:** maritime surveillance for illegal fishing prevention
- **Sensorization of Smart Cities:** traffic monitoring, smart transportation
