

# Software Developers (OF1917)

**Job description:** Our team has over 12 years of experience in biometric research and development. Our proprietary biometric recognition technology has been transferred to sectors like Banking, Health, Time & Attendance, and Access Control. We are looking for software developers to help us build awesome applications and add new features to our Biometrics codebase.

## Technical Skills

- Passionate about software development: experienced in some tech and always eager to learn new stuff and try different approaches.
- Your code is clean and easy to follow because you care about stuff like that.
- You have provable experience with object orientation and know the challenges and advantages of OO.
- Do you have experience with Android or iOS development? Are you familiar with DevOps? Any of those is a plus!
- We know what refactoring means, and we value reviewing our code from time to time and getting rid of coupling and code smells.
- We prioritize work in 2-3 week sprints. We practice Continuous Integration (version control, continuous build, automated testing). We pair and we write a lot of tests. If you have your own thoughts on how agile software development should be done, we'll be happy to hear them

## Personal Skills

- We are looking for a proactive person, with an interest in new technologies and a desire to propose new ideas.
- With the ability to work in a team both internally and with the client.
- Interest in the business, user experience of the technology developed will be valued.

## We Offer

- Innovative working environment  
Professional career within the Company
- Full-time job
- Initially, fixed-term contract
- Gross Salary/year: 20K-25K  
(negotiable)

Candidates please send a resume to [rrhh@gradient.org](mailto:rrhh@gradient.org) with the subject **Software Developers (OF1917)**
